PUBLICATION AVAILABILITY

Piper ceased production of all microfiche products in 2008.

Most information previously available on microfiche is now available exclusively via subscription from Veryon Technical Publications (see https://veryon.com/aviation-hub).

The exceptions are:

- Recently released service bulletins and service letters as well as the cumulative Service Bulletin and Service Letter Index (P/N 762-332).

- The Customer Service Information File (P/N 1753-755) now exists as the “Customer Service Information File.”

Both are available for download from: https://www.piper.com/technical-publications/

Airplane Pre-Flight Checklists

Separate Airplane Pre-Flight Checklists are not available from Piper (circa 1996). Piper publishes Pre-Flight Checklists in the appropriate Pilot’s Operating Handbook (POH) (in Section 4) or Pilot’s Operating Manual (POM) (in Operating Instructions), and in some Aircraft Owner’s Handbooks (AOH). If no pre-flight checklist is published by Piper use Section 10 in the FAA’s AC 20-106, Aircraft Inspection for the General Aviation Aircraft Owner, as a guide for developing your own.

Placing Orders

Please contact Veryon Technical Publications (https://veryon.com/aviation-hub) for Maintenance/Service Manuals, Parts Catalogs, Service Publication Collections (i.e., Service Bulletins, Service Letters, Vendor Service Publications, Service Spares Letters, etc.), Progressive and Special Inspection Manuals, and Periodic Inspection Report forms.

For all other publications:

In the United States, please contact your local Piper Dealer.

Outside the United States, please contact your local Piper Dealer or Field Service Facility.

See our website (www.piper.com) for the most current list of authorized Piper: Dealers, Sales Centers, and Service Centers

Please have the aircraft serial number identified when contacting Piper.

This catalog supersedes and voids all previous Service Letters issued under Service Letter No. 265 series and prior publication lists.

FLIGHT MANUALS

Federal Aviation Regulations state that "no person may operate a U.S.-registered civil aircraft unless there is available in the aircraft a current(1) approved Airplane Flight Manual (AFM)."

Depending on the age of the aircraft, approved airplane flight manuals for Piper airplanes were provided in one of the following formats:

Airplane Flight Manuals (AFM's)
Pilot's Operating Manuals (POM's)
Pilot's Operating Handbook (POH's)

Revisions are mailed to the current registered owner at no cost as they are released. Owners can submit updated address information via email to: customer.service@piper.com. Be sure to include the airplane serial number.

If your flight manual is not up-to-date, the last three revisions may be provided at no cost, depending on availability. Email techpubs@piper.com to order/check availability.

If, however, your flight manual is more than three revisions out-of-date or one or more of the last three revisions is no longer available, a complete replacement copy of the flight manual must be ordered and there will be a charge. Order by airplane serial number.

(1) See page 35 in the Customer Service Information File (P/N 1753-755), for a list of current revision dates for Piper Flight Manuals.

AIRCRAFT OWNER'S HANDBOOKS

Aircraft Owner's Handbooks (AOH's) contain expanded performance, operating, and system descriptive information to supplement that provided in the Airplane Flight Manual (AFM), see above. TAKE NOTE HOWEVER, THAT AN AIRCRAFT OWNER'S HANDBOOK IS IN NO WAY A SUBSTITUTE FOR AN AFM AND DOES NOT CONTAIN AN INDIVIDUAL AIRPLANE'S UNIQUE WEIGHT AND BALANCE DATA.

Additionally, in any case where the data in an AOH does not agree with that in the corresponding AFM, the AFM takes precedence. Aircraft Owner's Handbooks are current only at the time they are printed and no revision service is available.

PILOT INFORMATION MANUALS

Pilot Information Manuals (PIM's) are generic versions of the applicable Pilot's Operating Manual (POM) or Pilot's Operating Handbook (POH). TAKE NOTE HOWEVER, THAT A PIM IS IN NO WAY A SUBSTITUTE FOR A POM OR POH AND DOES NOT CONTAIN AN INDIVIDUAL AIRPLANE'S UNIQUE WEIGHT AND BALANCE DATA OR EQUIPMENT LIST.

PIM's are useful as training texts and for general information concerning aircraft systems and features. They are current only at the time they are printed and no revision service is available.

PROGRESSIVE INSPECTION MANUALS

Piper Progressive Inspection Programs comply with the F.A.A. Federal Aviation Regulations (FAR) Parts 43, 91 and 135 for progressive inspections.

The Progressive Inspection Program is designed to permit best utilization of the aircraft through the use of a planned inspection schedule at hour-based “Events” to complete an inspection “Cycle.” The inspection cycle will be completed every 200 hours and must be accomplished within twelve (12) calendar months from the date the inspection cycle was started.

Piper Progressive Inspection Programs are available in 25, 50 or 100 hour event cycles depending on aircraft model.

PERIODIC INSPECTION REPORT FORMS

The Periodic Inspection Report forms are copies of the inspection checklists contained in the appropriate aircraft service/maintenance manuals, conveniently repackaged as a check-off list to be used by the mechanic doing the inspection. They are revised as each service/maintenance manual is revised, but the latest revision of the service/maintenance manual must be consulted to insure the latest version of the Periodic Inspection Report form is being used.

These inspection reports meet all FAA requirements for 100 hour and annual inspection checklists.

*** The revision "Date" is a unique identifier to separate one version of a document or page from another. It will usually correspond roughly to the date the publication is disseminated, but should not be taken as the literal date the publication was available. Accordingly, the previous revision is valid and effective for up to 120 days (or more in special instances) after the dates given here. Supersedure occurs upon physical receipt of the electronic pdf file containing the newer revision.**

TR = Temporary Revision

NOTE: For older models published in the POM/AFM format (as in the example below), the "(W/B)" VB report listed in the POH column is the Weight and Balance section of the corresponding AFM. Likewise, the AFM itself is a section of the corresponding POM, when a POM exists.

ORDERING INSTRUCTIONS

POH: Order by report number.

POM: Order by part number. Be advised, some POM part numbers in this index include the letters "POM" as in "POM761-455". This may or may not appear on the actual publication, but must be used when ordering. (NOTE: Attn Dealers - Do not order in BAAN. Order manually.)

AFM: If no corresponding POM, order by AFM report number. Where provided, "TCDS Item #" refers to the Required Equipment 400-series number corresponding to the AFM in the TCDS.

If a corresponding POM is published, the AFM is not available separately. Accordingly, order the POM by part number (see Note, above).

W/B: Blank Weight and Balance reports are included as part of the POM or AFM when those publications are ordered. A copy of the original weight and balance report as the airplane left the factory is available separately, subject to payment of a research fee.

NOTE: This index is not all inclusive. If a flight manual for your airplane is not listed by model and serial effectivity, contact your Piper Dealer to determine the appropriate flight manual and the latest revision for your airplane.
